

Wei Chen - Bio

[Wei Chen](#) is an [Associate Professor](#) of [Operations and Information Management](#) (OPIM) at the [School of Business, University of Connecticut](#). He is also the academic director of the UConn [Digital Frontiers Initiative](#), which aims to facilitate collaborations between industry and academia, with a current emphasis on the business applications of [generative AI](#).

Wei's research centers on the design and governance of generative AI. His earlier work explored platforms, crowds, and financial technologies (FinTech), combining theoretical models with granular data to inform system and market design. His research has been published in top academic journals, including *Management Science*, *Information Systems Research*, *MIS Quarterly*, and *Production and Operations Management*. He has received multiple best paper awards and nominations at leading conferences, and is a recipient of both the Sandra A. Slaughter Early Career Award and the Gordon B. Davis Young Scholar Award from the INFORMS Information Systems Society.

Prior to join UConn in 2023, Wei was a tenured faculty member in the [MIS department](#) at the [Eller College of Management, University of Arizona](#). He received his PhD in Innovation, Technology and Operations from the [Rady School of Management, University of California, San Diego](#).
